Bibliometrical Review on REDD+ Research in Indonesia

Onrizal
Faculty of Forestry, Universitas Sumatera Utara
Scientific Publication Institute, Universitas Sumatera Utara
onrizal@usu.ac.id
Introduction

- a key to improve the human capacity to manage natural resources for better well being and environment

Research

Publication

• completes the process that begins with identifying the research question to be answered
• can be satisfying, and provides opportunities for you to receive feedback on your work from experts in your field

Without publication, science is dead (Gerald Piel)

Database

Research Metric

• important for mapping and improving the research atmosphere

1st Indonesian contribution on REDD+
Conclusions and Recommendations

• Indonesia forest is the hot topic related to REDD+
• However, there are still very few Indonesian institutions and researchers who have experienced it.
• It is a challenge for Indonesian researchers in general and especially for APIKI as Indonesia experts network to strengthen Indonesian REDD+ research to support the NDC target from land use sector.
